Weight, kg.....	0,25
PACKAGE CONTENTS	
Guitar pedal NR-10, pcs.....	1
User Manual, pcs.....	1

NOISE REDUCTION NR-10
Guitar pedal

User manual

YERASOV.

SAFETY MEASURES

- Keep away from high humidity.
- After exposure to cold, keep the device at room temperature for at least 30 minutes before switching on.
- Avoid dropping, keep away from dirt and water.

OVERVIEW

The **NR-10** Noise Suppressor effectively eliminates unwanted noise, hum and feedback while you play. Not only hardrockers with their high gain amps, but also those who mostly use clean and crunch settings will appreciate how gently **NR-10** treats the sound. Even if your Strat is equipped with vintage single coil pickups, this pedal will turn them into absolutely noiseless. The only knob controls the threshold, making the **NR-10** very easy to operate.

APPLICATION

The pedal is powered by either a 6F-22 battery or a 9V DC adapter. We recommend using YERASOV AD9-100 or AD9-400 adapters. For extended battery life unplug the guitar cable when device is not being used.

- Install battery or plug the adapter in.
- Connect the pedal as shown in the illustration.
- Turn the guitar volume knob to the maximum level for best results.
- The LED light indicates that the pedal is turned on.
- When used as an amplifier booster start off with the DRIVE control at the minimum level.
- Check the following setup configurations and pick the most effective one in your particular case:
 - As the first pedal in the effects chain (pic. 1);
 - Between the pedalboard and the amp (pic. 2);
 - Plugged into the effects loop of an amp (pic. 3).
- You can also combine those methods to achieve more flexibility if you have two NR-10 pedals.

SCS PEDAL BOARD

YERASOV **NR-10** is compatible with SCS Pedal Board. The SCS connector is at the bottom of the pedal, the cable is included in the SCS Pedal Board package. Fore more information please visit www.yerasov.ru

PANEL DESCRIPTION

- 1 - Output Jack
- 2 - DC adapter input
- 3 - On / Off LED indicator
- 4 - **THRESHOLD** - noise reduction control
- 5 - Input Jack
- 6 - On / Off Switch

CONNECTION POLARITY OF DC ADAPTER

BATTERY REPLACEMENT

Access the battery compartment by unscrewing the bottom cover. Always put the cover back after replacing the battery.
